

Weekly Progress Report			
Topic:	Chatbot – Final Project	Week No.	14
Course Code:	CSST101, CSST102	Term:	1st Semester
Course Title:	Advance Representation and Reasoning Basic Machine Learning	Academic Year:	2024-2025

Group Members:

- Reyes Vanesse V.
- Romero Keayon Ivan V.

Work Completed:

We tried to optimize the models performed by adjusting the columns we chose and improving the validation performance, we optimize the code on preprocessing side.

Challenges Encountered:

the slow progress of the training

Solutions Implemented:

We are currently thinking of using the gpu instead of cpu

Tasks for Next Week:

Try to maximize the training speed by using the gpu t4

Instructor's Feedback:
